

SENSOR LIGHT

COMPATABILITY

This sensor light is compatible with all Asgard sheds, it's magnetic strip simply attaches to the shed.v No tools are required to fit this light.

CHARGING INDICATOR

A blue light will show when the light is switched off. The amount of blue lights indicated the remaining power.

- < 20%
- 20% - 50% (One blue light and one blue flicker)
- 50-100% (Two blue lights, one blue light flicker)
- 100% (Three blue lights)

CONTROLS

The USB and power and function switches are located on the end of the light with the PIR sensor.

MODE INSTRUCTIONS

Always on Mode - Hold down the power button to start this mode. The always on mode simply leaves the light on and will not switch off if no movement is detected.

Green Light (Night Mode) - When the LED Sensor Light has been turned on, simply tap the power button to make the indicator green. The Sensor Light will automatically turn on if it detects motion within 3 metres.

Red Light (Day & Night Mode) - When the LED Sensor Light has been turned on, simply tap the power button twice to make the indicator red. The light automatically turns on if it detects motion or senses another light source when the door opens within 3 metres and automatically shuts off after 20 seconds of no movement.
